**LEADERS CONGREGATE TO DEVELOP  
BLUEPRINT FOR  
e-GOVERNANCE IN  
2013**

# ICT Innovations in Governance

**Major Gen R Siva Kumar**, CEO and Head, NRDMS and NSDI, Government of India

The Government of India has realised the importance of g-governance. So now in the twelfth five-year plan, under the Department of Science and Technology, it is launching a massive program called National Geospatial Information Systems. It shall bring together all excellent work done across the country and offer practical solutions.

**Dr K K Pathak**  
Secretary, Rajasthan Public Service Commission

While technology is making inroads in all aspects of governance and making innovations, we also need to be watchful about technology not becoming an obstacle in anyway. We need to analyse if there is a real and genuine demand for the services and solutions that we are offering.

**Prem Narayan**  
Director, Ministry of Urban Development, Government of India

e-Awas - our e-Governance Award winning national website - takes care of 66,000 online houses allotments in Delhi alone. Other initiatives include e-Seva, CPWD online service monitoring for government accommodation and maintenance; and e-Dharti, an initiative on management of government properties.

**V K Sharma**  
CEO & Director, Gujarat Info Petro Ltd

We have created Smartphone Surveillance System for the Forest Department, whereby all beat guards are provided with a smartphone and central control command monitors their position & alerts them. Also we have Crop Certifying System and Tablet-based Seed Certification for the Agriculture Department; and e-Challan System for the Traffic Police.

**Sandeep Ahlawat**,  
Head, State e-Mission Team SeMT, Government of Delhi

In order to bring in efficiency and sustainability, around twelve states have enforced Service Guarantee Act. This ensures that the government departments deliver their services in a time-bound manner. If a delivery is delayed beyond stipulated period then a penalty will be paid to the consumer.

**Santulan Chaubey**, Director, Delhi eGovernance Society

We created Delhi Geo Spatial Act 2011, which has made mandatory for all users of land departments to use the Delhi State Spatial Data and also update it. Basically, the purpose is that whatever data is collected will remain there and its updation will be sustainable. So the data will be there and we can use this data for our applications.
